

GARDEN ORNAMENTS

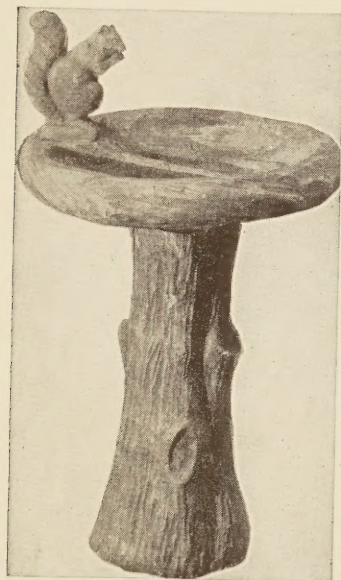

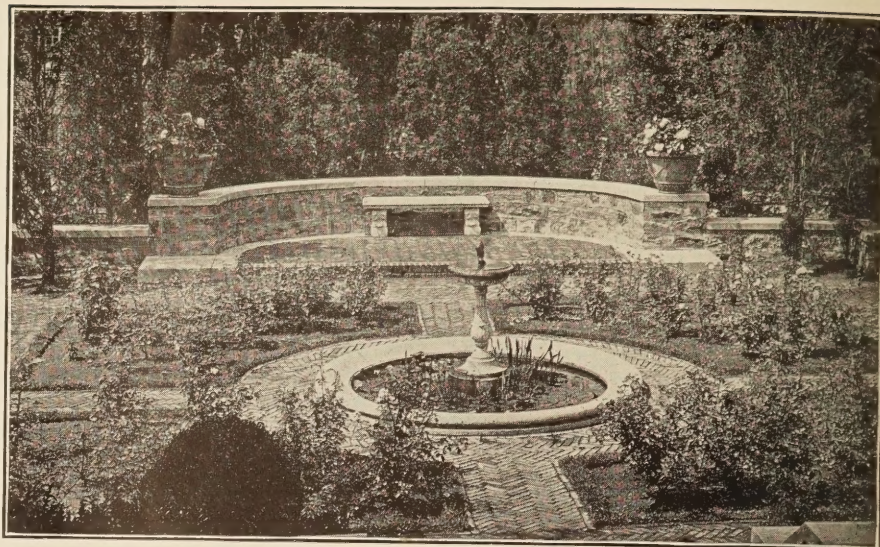

A sepia-toned photograph of a garden. In the center-right, there is a tiered stone fountain with three basins, set within a rectangular stone base. To the left of the fountain, there are several trees, including a tall, slender tree and a palm tree. In the background, a building with a tiled roof is visible. The overall scene is a well-maintained garden with various plants and structures.

THE ERKINS STUDIOS

THE FORMAL GARDEN depends upon sculpture and ornaments for many of its effects. So, too, the beauty of the informal garden may be enhanced by the use of well chosen ornaments.

This catalog illustrates some of the more popular designs in our collection, which includes Italian Marble and Stone, English and Domestic Lead, Bronze, Italian and Domestic Terra Cotta, and our Pompeian Stone—a composition which resembles grey Indiana Limestone in color, texture, and durability. We have hundreds of models which are not shown in the catalog, and, if you do not find what you desire among the designs pictured, we shall be glad to submit additional suggestions for your consideration if you will tell us what you require.

We are equipped to execute special work, and shall gladly furnish estimates for work made to your own designs, or we can submit special sketches for your approval. The back cover illustrates some of our special work.

VICENZA STONE FIGURES FROM ITALY

Vicenza stone is a natural stone, quarried in Italy, where these lovely figures were carved by hand. The stone has a patined finish, giving it a mellow beauty ordinarily found only in antique sculpture. The figures, which are individually carved, vary slightly in detail of drapery, flowers, etc., in each importation. We shall be pleased to send photographs showing detail of figures then available if you will write to us about your requirements.

SPECIAL ORDER DEPARTMENT

For fifty years a very important function of the ERKINS STUDIOS has been the designing of special garden features in collaboration with outstanding Landscape Architects, Architects, and Decorators in the execution of their own designs for some of the loveliest gardens in this country.

We are fully equipped to execute work in Pompeian Stone (a composition resembling limestone), real stone, marble, lead and bronze, and our Special Order Department will be happy to estimate on your special designs, or to submit sketches of ornaments in keeping with your own ideas.
